PROFILE

Experienced and motivated Java Developer with over 3 years of practical experience in software development. Skilled in utilizing Java programming language with Spring and Spring Boot, to create robust and efficient solutions.

With a background in the dynamic hospitality industry, I approach every project with a diverse perspective and adaptable problem-solving approach.

My international experiences have not only enhanced my technical skills but also improved my ability to communicate effectively across different cultures and languages. Beyond my professional work, I experimented JavaScript frameworks like React, Next.js, and Angular, adding to my skill set. This allows me to approach projects with a more comprehensive toolkit, seamlessly integrating front-end technologies with Java-based back-end systems.

Passionate about innovation and dedicated to delivering excellence, I thrive in collaborative and creative environments. I'm eager to bring my unique experiences and skills to your team, contributing to the development of cutting-edge software solutions that exceed expectations.

EMPLOYMENT HISTORY

Java Software Developer at Swag oü, Tallinn

April 2021 — Present

- Develop and maintain Java-based applications, specializing in third-party integrations and microservices architecture.
- Contribute to the design, implementation, and testing phases of software projects, ensuring alignment with project requirements.
- Collaborate effectively with cross-functional teams to overcome technical challenges and deliver high-quality software solutions.
- Utilize Kubernetes on Google Cloud to optimize application deployment and scalability.
- Work with relational and non-relational databases, such as MySQL and Redis on everyday basis.
- Implement Kafka for building scalable and resilient microservices architectures.
- Manage codebase efficiently using Git for version control, ensuring smooth collaboration and coordination among team members.
- Foster a collaborative environment to streamline development processes and drive project success.

Java Software Developer at Freelancer, Remote

May 2022 — Present

As a freelance Java software developer, I dedicate a few hours at week collaborating on various projects across different industries. Notably, I've contributed to the development of an e-commerce platform for a wines company, where each wine product is linked to a non-fungible token (NFT) on the Polygon chain, providing unique ownership verification mechanisms.

Additionally, I've been involved in implementing a cryptocurrency payment gateway to facilitate seamless transactions within digital markets. Furthermore, I've supported the development of a restaurant docket software, enhancing order management for improved customer service.

In each of these projects, I've collaborated closely with other developers, leveraging my expertise in Spring Boot, PostgreSQL, and Kafka to ensure smooth implementation and

integration. My role emphasises effective teamwork and technical proficiency to deliver high-quality solutions that meet client needs and exceed expectations.

Technical Support Agent at Swag oü, Tallinn

January 2021 — April 2021

- Provided technical support to users, troubleshooting issues and resolving software-related problems in a timely manner.
- Communicated effectively with clients to understand their needs and provide appropriate solutions, enhancing overall customer satisfaction.

Hospitality Professional at Various Establishments, Various Locations

April 2014 — July 2020

Throughout my career, I've gained extensive hospitality experience across various establishments in different locations.

As a Hospitality Professional, I've held roles such as Head Bartender, Cafe' And Bar Manager, Assistant Supervisor, F&B Attendant, Cultural Representative, and Assistant Manager in locations spanning from Sicily, Italy to Auckland, New Zealand.

In each position, I've demonstrated a strong commitment to delivering exceptional service, managing operations efficiently, and fostering a positive work environment.

My diverse background has equipped me with valuable skills in customer service, team leadership, and adaptability, making me a versatile and capable professional in the hospitality industry.

EDUCATION

Higher Technical Diploma, Hospitality and Tourism, ITS Fondazione Archimede, Siracusa

September 2011 — September 2013

I completed a Higher Technical Diploma in Hospitality and Tourism from ITS Fondazione Archimede, where I gained comprehensive knowledge and skills in the hospitality sector. This education provided me with a solid foundation in hospitality management, customer service, and tourism operations, enhancing my ability to excel in various roles within the industry.

High School Diploma, Agriculture, Agriculture Operations, and Related Sciences, IPAA Siracusa, Siracusa

September 2006 — September 2011

Earned a High School Diploma in Agriculture, Agriculture Operations, and Related Sciences from IPAA Siracusa.

COURSES

Developing Applications with Google Cloud Specialization, Google

April 2024 — April 2024

Java Programming and Software Engineering Specialization, Coursera

January 2023 — January 2023

Version Control with GIT, Atlassian

February 2021 — February 2021

IMB Data Science Professional Certificate, IBM

August 2020 — August 2020

CAREER HIGHLIGHTS

Software Developer, Swag oü

Achieved recognition as one of the top employees at Swag oü for three consecutive years: 2021, 2022, and 2023.
